

g.tec's recoveriX and mindBEAGLE Workshop

Time & Date: Sunday November 4th, 2018, 6:30-8:30 PM

Location: SFN, San Diego Convention Center, SDCC 10

About the Workshop

Brain-computer interface systems can be used for many different applications. This workshop will show two high impact applications (i) motor recovery of stroke patients and (ii) consciousness assessment and communication. This year we will show newest validation results of recoveriX with stroke patients from partners in Japan, China, Europe, USA and newest validation results with LIS/CLIS and DOC patients with mindBEAGLE. We will show you how to get DOC patients to communicate. Furthermore the franchise and gym concept will be explained.

Speakers

Dr. Christoph Guger, DI Katrin Mayr
g.tec medical engineering GmbH

Dr. Christoph Guger is the CEO of g.tec medical engineering GmbH and is coordinating EU Horizon 2020 research projects such as recoveriX, ComAware, ComAlert and RapidMaps. He is also involved in the Flagship project Graphene.

Katrin Mayr is a specialist for neuro-rehabilitation with recoveriX technology. She will demonstrate different BCI experiments during the workshop.

Workshop Schedule

mindBEAGLE Consciousness Assessment

Program Overview

6:30 – 7:00	Introduction: non-invasive brain-computer interface systems and foundations of DOC BCIs
7:00 – 7:15	Cognitive assessment of DOC and locked-in and DOC patients using BCI technology
7:15 – 7:30	Running and interpreting cognitive assessments and overview of international work with mindBEAGLE
7:30 – 8:00	Strategies to run motor recovery training with BCI systems. The franchise concept and recoveriX-gyms.
8:00 – 8:30	Running motor recovery training with BCI systems and overview of international work with recoveriX

Time & Date: Sunday November 4th,
2018, 6:30-8:30 PM

Location: San Diego Convention Center,
Room SDCC 10
